<a href="#">Google Inbound Links</a>	26	16	0
<a href="#">Yahoo Inbound Links</a>	1,935	505	670

<a href="#">Delicious Saved Count</a>	197	7	0
<a href="#">Google Indexed Pages</a>	671	6,940	323

## Google PageRank : 5

"Google PageRank relies on the uniquely democratic nature of the web by using its vast link structure as an indicator of an individual page's value. In essence, Google interprets a link from page A to page B as a vote, by page A, for page B. But, Google looks at more than the sheer volume of votes, or links a page receives; it also analyzes the page that casts the vote. Votes cast by pages that are themselves important weigh more heavily and help to make other pages important."  
-From Google

## Web Page Structure

To learn more about what meta-data is and why it is important, take a look at the following article:

[SEO for Small Business Executives: Understanding the Magic Of Meta-Data](#)

Title :	AskApache
Description :	Web Development and Design blog about Web Servers and Internet Protocols detailing Security with htaccess tutorials and example mod_rewrite
Meta Keywords :	htaccess, apache, security, seo, wordpress, php, cache, webmaster, dreamhost, linux unix bsd, google, web tools, shell scripting, javascript, making money, web design, css, windows, phpbb, flash, ajax

### High Number Of Meta Keywords

There are a high number of keywords in the meta-data of the web page. We believe that though the search engines don't weigh keywords as heavily as they used to, they're still important to get right. By using a high number of keywords, it is possible that you are diluting the effect of your most important keywords. We would suggest keeping the keywords to 10 or less. Currently, this site has 21 keywords in the meta-data.

## Heading Summary

Similar to how newspapers and magazines use headings and sub-headings to help readers, websites can use special tags in their HTML. These tags not only help human readers read the content, they also help search engine spiders better understand the content on a page and what is most important. It is generally a good idea to use heading tags to help signal to the search engines, what the web page is about.

## Image Summary

---

Images are a great way to enhance a website from a user's perspective. However, it is important to note that search engine crawlers cannot really "see" images. So, if you have lots of images that contain textual content within the image itself, this content will not be seen by the crawlers.

HTML helps address this issue by providing a way to specify the textual content for an image using the "alt" attribute. The alt attribute allows web pages to assign specific text as the "alternative" content for images for those that cannot view the images themselves. This can be search engine crawlers or text-only web browsers.

---

---

## Google Indexed Pages : 671

---

Measures the approximate number of pages on <http://www.askapache.com/> that have been stored in the Google index. The Google web crawler will visit the website periodically and look for new content and store it in its index. Generally, the more pages a website has within the Google cache, the better.

---

## Google Crawl Date : October 05, 2007 @ 06:12 PM

---

Google will periodically crawl websites looking for new and updated content. In general, it is desired to have the frequency with which Google crawls a site to be higher, rather than lower. Sites that get crawled more often have more frequent updates and more authority.

---

## Conversion Methods

---

The WebSite grader attempts to measure both the ability for a website to *attract* traffic and the ability to *convert* that traffic into qualified leads and prospects. The software searches for common conversion mechanisms such as "calls to action". Examples include RSS feeds, email subscription forms and other ways that site visitors can express interest in the offering.

---

## Inbound Links

---

One of the most important measures for a website is how many other sites are linking to it. The more links the better.

---

### Links Summary

Google :	26
Yahoo :	1,935

---

## Technorati Ranking : 18,487

---

[Technorati](#) is a popular website ranking service. It measures the popularity of a given website as compared to all other sites that have been submitted to its system.

This website currently has a Technorati ranking of 18,487.

---

## del.icio.us bookmarks : 197

---

[del.icio.us](#) is a web-based bookmarking site. Delicious users save their bookmarks on the website so they can access them from any browser. A website that has many users bookmarking it is generally popular and will get more traffic. <http://www.askapache.com/> has about **197** bookmarks stored.

---

## Alexa Traffic Ranking : 32,619

---

[Alexa](#) is an online service that measures the approximate traffic for millions of sites on the Internet.

The website <http://www.askapache.com/> has a ranking of 32,619. This means that it is the 32,619th most trafficked site on the web -- as measured by Alexa.

---

## Readability Level : Advanced Degree (PhD)

---

This score measures the approximate level of education necessary to read and understand the web page content. In most cases, the content should be made to be simple so that a majority of the target audience can understand it.
