

#Turning on the rewrite engine is necessary for the following rules and features.

#FollowSymLinks must be enabled for this to work.

```
<IfModule mod_rewrite.so>  
    Options +FollowSymLinks  
    RewriteEngine On  
    RewriteCond %{REQUEST_FILENAME} !-f  
    RewriteCond %{REQUEST_FILENAME} !-d  
    RewriteRule . index.php [L]  
</IfModule>
