

```
## This is placed here to bar someone from directly access into this folder.  
## This only supports server that has mod_rewrite.  
## Maybe a better approach is to use the installer to write a permanent 301 to have  
request_uri get into downloads/index.php as index.php?request_uri=$1  
## I'm not very familiar with htaccess. someone help do it.  
<IfModule mod_rewrite.c>  
RewriteEngine on  
RewriteRule ^.+ $ ../index.php [L]  
</IfModule>
```
