

```

# htaccess for root dir of lilypond.org
# -----
#   The file comes from git master:
#   Documentation/web/server/lilypond.org, htaccess
#
#   Please do not edit it directly (unless something
#   is critically broken); instead, change it in git
#   and then do the:
#       update-git.sh
#       check-git.sh
#       copy-git.sh
#       make-website.sh
#   as discussed in:
#       Contributor 5.2 Uploading and security
# -----

```
