### Additional Settings that may need to be enabled for some servers
### Uncomment the commands by removing the # sign in front of it.
### If you get an "Internal Server Error 500" after enabling any of the following
settings, restore the # as this means your host doesn't allow that.

# 1. If your cart only allows you to add one item at a time, it is possible
register_globals is on. This may work to disable it:
# php_flag register_globals off
```

```
# 2.  If your cart has magic quotes enabled,  This may work to disable it:
# php_flag magic_quotes_gpc Off

# 3.  Set max upload file size.  Most hosts will limit this and not allow it to be
overridden but you can try
# php_value upload_max_filesize 999M

# 4.  set max post size.  uncomment this line if you have a lot of product options or are
getting errors where forms are not saving all fields
# php_value post_max_size 999M

# 5.  set max time script can take.  uncomment this line if you have a lot of product
options or are getting errors where forms are not saving all fields
# php_value max_execution_time 200

# 6.  set max time for input to be recieved.  Uncomment this line if you have a lot of
product options or are getting errors where forms are not saving all fields
# php_value max_input_time 200

# 7.  disable open_basedir limitations
# php_admin_value open_basedir none

php_flag display_errors On
php_value error_reporting 2047
```
