# Settings below to handle larger uploads.
# The current setting below for upload_max_filesize & post_max_size means can upload 10
files with 1GB each in size simultaneously.

# The maximum size for a single POST.
# Set to 1G.
php_value upload_max_filesize 1G

# The maximum size for all POSTs.
# Set to 10G.
php_value post_max_size 10G

# How much time should be allowed to retrieve data from POST.
# Set to 1 hour. Higher value could be too much.
php_value max_input_time 3600

# Limit on the allowed size of an HTTP request message body.
# Set to 0 for no limit.
LimitRequestBody 0
