

AddDefaultCharset UTF-8

Kirby .htaccess

enable php for directory indexes.

this should be enabled by default, but let's just make sure

DirectoryIndex index.php index.html index.htm

rewrite rules

<IfModule mod_rewrite.c>

enable awesome urls, i.e.:

http://yourdomain.com/about-us/team

RewriteEngine on

RewriteCond %{REQUEST_FILENAME} !-f

RewriteCond %{REQUEST_FILENAME} !-d

make sure to set the RewriteBase correctly

if you are running the site in a subfolder.

Otherwise links will break.

#

If your homepage is http://yourdomain.com/mysite

Set the RewriteBase to:

#

RewriteBase /mysite

#

redirect everything to index.php

RewriteRule ^(.*) index.php [L]

</IfModule>
