

Why rewrite URLs? Read this: http://en.wikipedia.org/wiki/Rewrite_engine

Apache (.htaccess or httpd.conf)

Make sure AllowOverride is on for the directory, or put the rewrite rules in httpd.conf

<http://httpd.apache.org/docs/2.0/mod/core.html#allowoverride>

RewriteEngine On

RewriteCond %{REQUEST_FILENAME} !-f

RewriteRule . /index.php [L]

AddType text/cache-manifest .appcache
