

```
# Workaround:  
# Order, Allow and Deny directives have been deprecated since version 2.3 in favor of  
# AuthZ's Require directive.  
# Versions 2.2 and earlier do not support said directive.  
<IfVersion >= 2.3>  
    Require all denied  
</IfVersion>  
<IfVersion < 2.3>  
    Order Allow,Deny  
    Deny from All  
</IfVersion>
```
