

Options None

Options +FollowSymLinks

Set a handler to prevent scripts from being executed.

SetHandler Security_Do_Not_Remove

<Files *

Override the handler again if we're run later in the evaluation list.

SetHandler Drupal_Security_Do_Not_Remove

</Files>

If we know how to do it safely, disable the PHP engine entirely.

<IfModule mod_php5.c>

php_flag engine off

</IfModule>
