<IfModule mod_rewrite.c>

######################################################
#  READ THIS COMPLETELY IF YOU CHOOSE TO USE THIS FILE
#
# The line just below this section: 'Options +FollowSymLinks' may cause problems
# with some server configurations.  It is required for use of mod_rewrite, but may already
# be set by your server administrator in a way that dissallows changing it in
# your .htaccess file.  If using it causes your server to error out, comment it out (add #
to
# beginning of line), reload your site in your browser and test the plugin.  If it works,
# it has been set by your server administrator and you do not need it set here.
#
######################################################

# Can be commented out if causes errors, see notes above.
Options +FollowSymLinks
```

```
#  mod_rewrite in use
RewriteEngine On

RewriteRule ^(.*?)(test_mod_rewrite) /$1media/plg_jchoptimize/assets/modrewrite.php?q=$2

RewriteRule ^(.*?)(gz|nz)/([^/]+)/([^/]+)/([^/]+)\.(js|css)$
/$1media/plg_jchoptimize/assets/jscss.php?f=$5&type=$6&gz=$2&d=$3&i=$4
