

```
# This file introduces rewrite rules of Nginx to enable the URI mode.
# Usage:
#
#   Copy this file to root of LRT framework as name '.htaccess', and then
# include the new file in your virtual host configuration file.
#
# Windows:
#
#   mklink /H .htaccess boot\.htaccess\nginx-uri.htaccess
#
# Linux:
#
#   In boot\.htaccess\nginx-uri.htaccess .htaccess
#
```

```
location ~ /\.ht {
    deny all;
}
```

```
location ~ ^/(bin|boot|dev|lib|var|view|tools|model) {
    deny all;
}
```

```
error_page 400          /public/common/400.html;
error_page 401          /public/common/401.html;
