# Rewrite rules for ODDT Balance web applications.
```

```
#
# Enable the rewrite engine
```

```
RewriteEngine On
```

```
# Make sure that the value for RewriteBase exactly matches the
# value for site_root in config.ini. This value should point to the
# location (relative to the server's document root) of the
# Balance webapp directory (the directory containing config.ini). For
# example, if the application lives at the server's document root, then
# RewriteBase should be set to '/'. If, on the other hand, the application
# has been installed into a subdirectory 'foo' underneath the server's
# document root, RewriteBase (and site_root in config.ini) should be set
# to '/foo/'
```

```
RewriteBase /
```

```
# This section forwards all requests to the Balance application's front
# controller. Unless you are modifying the low-level behavior of the
# Balance application framework, there should be no need to make any
# modifications below this line. -----
#
```

```
# Send all other non-static requests to the main controller
```

```
RewriteCond %{REQUEST_URI} !/static/(.*)$
```

```
RewriteCond %{REQUEST_URI} !/static/(.*)$
```

```
RewriteCond %{REQUEST_URI} !/scripts/(.*)*$  
RewriteCond %{REQUEST_URI} !/global/(.*)$  
RewriteCond %{REQUEST_URI} !index\.\php/.$  
RewriteRule ^(.+)$ ./index\.\php/$1 [L,NC]
```
