## Options can use, it is good to add the following setup.  
#Options -Indexes -ExecCGI
```

```
## In the case of public plug-in, it is good to set up in this way.  
#<FilesMatch "\.(inc\.pl|pl)$">  
# Order deny,allow  
# Allow from all  
#</FilesMatch>  
#AddType text/plain .pl
```
