

RewriteEngine On

```
# Request redirect with response code 301 "Permanently moved" if a trailing  
# / was found. This will indicate to search engines that the content is  
# the same and that we prefer not using a slash.
```

```
RewriteCond %{ENV:REDIRECT_STATUS} =""
```

```
RewriteRule ^(.*)/$ /$1 [R=301,L]
```

```
# Alternatively if you want to always add a slash uncomment  
# this rule rather and comment the previous rule leaving the  
# line starting with "RewriteCond" as it is.
```

```
# RewriteRule ^(.+[^/])$ /$1/ [R=301,L]
```

```
# Be careful not to use both at the same time or you will end  
# up with a redirect loop.
```

```
# Redirect all requests not pointing at an actual file to index.php
```

```
RewriteCond %{REQUEST_FILENAME} !-f
```

```
RewriteRule . index.php [L]
```
