

```
#  
# This alternate app directory exists for domains that need to use  
# plymouth-webapp as the DocumentRoot, such as go.plymouth.edu.  
#  
# In production, VirtualHosts should be pointed at this directory.  
#  
# In development environments, the directory should be symlinked  
# out from a git clone. Example:  
#  
#     adam.psudev.com/  
#     go.adam.psudev.com -> adam.psudev.com/app-alternate  
#
