Bootstrap is not a Loris module, don't rewrite it.

RewriteRule ^bootstrap/(.*) bootstrap/\$1 [L]

Redirect /CandID/ to visit label list

RewriteRule ^([0-9]{6,6})/\$ /main.php?test_name=timepoint_list&candID=\$1

Want to redirect /CandID/Visit_label/ to instrument list, but

because of the main.php URL structure it needs to be the sessionID instead

of Visit_label

RewriteRule ^([0-9]{6,6})/([0-9]+)/\$ /main.php?

test_name=instrument_list&candID=\$1&sessionID=\$2

Preferences is a special case for url rewriting

RewriteRule ^preferences/\$ /main.php?test_name=user_accounts&subtest=my_preferences

Rewrite /foo/ to appropriate module

Includes /foo/css/cssfile.css

/foo/js/javascriptfile.js

/foo/ajax/AjaxScript.php

To use the appropriate helper script as well.

RewriteRule ^([a-zA-Z]+)/\$ /main.php?test_name=\$1

RewriteRule ^([a-zA-Z]+)/css/([a-zA-Z0-9.]+\$) /GetCSS.php?Module=\$1&file=\$2

RewriteRule ^([a-zA-Z]+)/js/([a-zA-Z0-9.]+\$) /GetJS.php?Module=\$1&file=\$2

RewriteRule ^([a-zA-Z]+)/static/([a-zA-Z0-9.]+\$) /GetStatic.php?Module=\$1&file=\$2

RewriteRule ^([a-zA-Z]+)/ajax/([a-zA-Z0-9.]+\$) /AjaxHelper.php?Module=\$1&script=\$2

Handle submodules too under /foo/submodulename

RewriteRule ^([a-zA-Z]+)/([a-zA-Z0-9.]+)/\$ /main.php?test_name=\$1&subtest=\$2
