RewriteEngine on

#RewriteBase /unknown_folder/media/thumbnails/ # optional, depends on your setup

#Check for file existence here and forward if exists

#RewriteCond %{REQUEST_FILENAME} !-f

#RewriteCond %{REQUEST_FILENAME} !-d

#RewriteRule ^([0-9+)-([0-9+)-([0-9+)-(-crop))?.jpg\$ thumbnail.php?id=\$1&w=\$2&h=\$3&c=\$4

#RewriteRule ^(.)\$ thumbnail.php?file=\$1*

Capture the filename and query strings

#RewriteCond %{REQUEST_FILENAME} .(jpg|gif|png)\$

#RewriteCond %{QUERY_STRING} w=([0-9+])&h=([0-9+])(&c=true)

#####;

Dash-delimited format

Check if file exists

RewriteCond %{REQUEST_FILENAME} !-f [OR]

Refresh if has query string ?refresh=true

RewriteCond %{QUERY_STRING} ^refresh\$

Check the formatting

RewriteCond %{REQUEST_FILENAME} /([^\./]+)-([jpg|gif|png|video)-([0-9+)-([0-9+)-([true|false])

If file doesn't exist, send here:

RewriteRule ^.*\$ thumbnail.php?file_name=%1&extension=%2&w=%3&h=%4&c=%5&refresh=%{QUERY_STR

#####;

Query String Format

Check the formatting

RewriteCond %{SCRIPT_FILENAME}%{QUERY_STRING} /([^\./]+).([jpg|gif|png|video]?w=([0-9+])&h=([0-9+])&c=([true|false])

Only forward to thumbnail.php if file doesn't exist

#RewriteCond %1-%2-%3-%4-%5.jpg !-f

If file doesn't exist, send here:

RewriteRule ^.*\$ thumbnail.php?file_name=%1&extension=%2&w=%3&h=%4&c=%5
