*### Additional Settings that may need to be enabled for some servers  
### Uncomment the commands by removing the # sign in front of it.  
### If you get an "Internal Server Error 500" after enabling any of the following settings, restore the # as this means your host doesn't allow that.*

*# 1. If your cart only allows you to add one item at a time, it is possible register\_globals is on. This may work to disable it:  
# php\_flag register\_globals off*

*# 2. If your cart has magic quotes enabled, This may work to disable it:  
# php\_flag magic\_quotes\_gpc Off*

*# 3. Set max upload file size. Most hosts will limit this and not allow it to be overridden but you can try  
# php\_value upload\_max\_filesize 999M*

*# 4. set max post size. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields  
# php\_value post\_max\_size 999M*

*# 5. set max time script can take. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields  
# php\_value max\_execution\_time 200*

*# 6. set max time for input to be recieved. Uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields  
# php\_value max\_input\_time 200*

*# 7. disable open\_basedir limitations*

*open\_basedir = /*

*# php\_admin\_value open\_basedir none*
