

#gecko browsers (FireFox) has very strict XSS rules and even disallow fonts from third domain sources

#to allow these fonts to be loaded, you can use the following three lines of Apache configuration

```
<FilesMatch "\.(ttf|ttcl|otf|eot|woff|svg|pfa|ps)$">
  <IfModule mod_headers.c>
    Header set Access-Control-Allow-Origin "*"
    Header set Access-Control-Allow-Headers "origin, x-requested-with, content-type"
    Header set Access-Control-Allow-Methods "GET"
  </IfModule>
</FilesMatch>
```
