<IfModule mod_rewrite.c>
```

```
#####
# READ THIS COMPLETELY IF YOU CHOOSE TO USE THIS FILE
#
# The line just below this section: 'Options +FollowSymLinks' may cause problems
# with some server configurations. It is required for use of mod_rewrite, but may already
# be set by your server administrator in a way that disallows changing it in
# your .htaccess file. If using it causes your server to error out, comment it out (add #
# to
# beginning of line), reload your site in your browser and test the plugin. If it works,
# it has been set by your server administrator and you do not need it set here.
#
#####
# Can be commented out if causes errors, see notes above.
