

```
# PHP configuration
# Depending on server configuration you might need to use a local php.ini to configure
those, and the bellowing lines might generate a 500 code error.
# 1and1 hosting: http://faq.1and1.com/scripting\_languages\_supported/php/14.html
# Site5 hosting: http://forums.site5.com/showthread.php?t=3689#1
# Mediatemple GS hosting:
