

RewriteEngine on

We're gonna handle cache and compression with PHP

#RewriteRule ^style.css\$ style.css.php [L]

#RewriteRule ^favicon.ico\$ favicon.ico.php [L]

#RewriteRule ^js/javascript.js\$ js/javascript.php [L]

Now we figure out which scripts to load with pretty URLs

RewriteRule ^commentsrss/([^\.]+)/?\$ rss.php?id=\$1 [L]

RewriteRule ^rss/([^\.]+)/?\$ rss.php?id=\$1 [L]

RewriteRule ^rss/([^\.]+)/([^\.]+)/?\$ rss.php?id=\$1&who=\$2 [L]

RewriteRule ^1/([^\.]+)/?\$ json.php?id=\$1 [L]

RewriteRule ^([^\.]+)/([^\.]+)/?\$ index.php?id=\$1&table=\$1&ts=\$2 [L]

RewriteRule ^([^\.]+)/?\$ index.php?id=\$1 [L]

We don't need ETags since we're using other caching mechanisms
