

DirectoryIndex home

#Options +FollowSymlinks

RewriteEngine On

Explicitly disable rewriting for front controllers

RewriteRule ^app_dev.php - [L]

RewriteRule ^app.php - [L]

RewriteCond %{REQUEST_FILENAME} !-f

Change below before deploying to production

#RewriteRule ^(.)\$ app.php [QSA,L]*

RewriteRule ^(.*)\$ app_dev.php [QSA,L]

im still testing it under the dev env.
