

```
#  
# This is used with Apache WebServers  
# The following blocks direct HTTP requests in this directory recursively  
#  
# For this to work, you must include the parameter 'Limit' to the AllowOverride  
# configuration  
#  
# Example:  
#  
<Directory "/usr/local/apache/htdocs">  
# AllowOverride Limit  
#  
# 'All' will also work. (This configuration is in your apache/conf/httpd.conf file)  
#  
# This does not affect PHP include/require functions  
#  
# Example: http://server/catalog/includes/application_top.php will not work  
  
<Files *.php>  
Order Deny,Allow  
Deny from all  
</Files>
```
