

DirectoryIndex index.php

<IfModule mod_rewrite.c>

RewriteEngine on

Please note that RewriteBase setting is obsolete use it only in case you experience some problems with SEO addon.

Some hostings require RewriteBase to be uncommented

Example:

Your store url is http://www.yourcompany.com/store/cart

So "RewriteBase" should be:

RewriteBase /store/cart

RewriteBase /

RewriteCond %{REQUEST_URI} .*mod_rewrite\$

RewriteRule . index.php [L,QSA]

</IfModule>
