# This is used with Apache WebServers

# The following blocks direct HTTP requests in this directory recursively

#

# For this to work, you must include the parameter 'Limit' to the AllowOverride
configuration

#

# Example:

#

#<Directory "/usr/local/apache/htdocs">

# AllowOverride Limit

#

# 'All' will also work. (This configuration is in your apache/conf/httpd.conf file)

#

# This does not affect PHP include/require functions

#

# Example: http://server/catalog/includes/application_top.php will not work
