

```
# WHAT'S THIS?  
# A boilerplate for gzipping files via .htaccess.  
#  
# HOW TO USE:  
# add to your existing .htaccess or create a new  
# one by removing "gzip" from the file name.  
#  
<ifModule mod_deflate.c>  
  <FilesMatch "\.(js|css|html|html|txt|svg|jpg|jpeg|png|gif|bmp)$">  
    SetOutputFilter DEFLATE  
  </FilesMatch>  
</ifModule>
