```
# The following directives force the content-type application/octet-stream
# and force browsers to display a download dialog for non-image files.
# This prevents the execution of script files in the context of the website:
ForceType application/octet-stream
<IfModule mod_headers.c>
  Header set Content-Disposition attachment
</IfModule>
<FilesMatch "(?i)\.(gif|jpe?g|png)$">
  ForceType none
  <IfModule mod_headers.c>
    Header unset Content-Disposition
  </IfModule>
</FilesMatch>

# The following directive prevents browsers from MIME-sniffing the content-type.
# This is an important complement to the ForceType directive above:
<IfModule mod_headers.c>
  Header set X-Content-Type-Options nosniff
</IfModule>

# Uncomment the following lines to prevent unauthorized download of files:
#AuthName "Authorization required"
#AuthType Basic
#require valid-user
```
