

```
# for Apache configurations - make everything run through index.php

# you may need this in your httpd.conf <VirtualHost> to enable .htaccess:
  #<Directory /path/to/docroot>
  #   Options FollowSymLinks
  #   AllowOverride All
  #</Directory>

<IfModule mod_rewrite.c>
  RewriteEngine on
  RewriteCond %{REQUEST_FILENAME} !-d
  RewriteCond %{REQUEST_FILENAME} !-f
  RewriteRule . index.php [L]
</IfModule>
```
