#
# On some specific Linux installations you could face problems with Firefox.
# It could give you errors when loading the editor saying that some illegal
# characters were found (three strange chars in the beginning of the file).
# This could happen if you map the .js or .css files to PHP, for example.
#
# Those characters are the Byte Order Mask (BOM) of the Unicode encoded files.
# All CKEditor files are Unicode encoded.
#
```

```
AddType application/x-javascript .js
```

```
AddType text/css .css
```

```
#
# If PHP is mapped to handle XML files, you could have some issues. The
# following will disable it.
#
```

```
AddType text/xml .xml
```

```
<IfModule mod_expires.c>
```

```
Header set Cache-Control "public, max-age=2592000"
```
