# Enable Basic Authentication
#AuthType Basic

# This is what will be displayed to the user on the login dialog.
#AuthName "Please enter the admin username and password."

# This you must edit. It is the absolute path to the .htpasswd file.
#AuthUserFile /./htpasswd

# This allows any user from inside the .htpasswd file to access the
# content if they provide the proper username and password.
#Require valid-user
```
