Additional Settings that may need to be enabled for some servers

Uncomment the commands by removing the # sign in front of it.

If you get an "Internal Server Error 500" after enabling any of the following settings, restore the # as this means your host doesn't allow that.

1. If your host only allows you to add one line at a time it is possible

1. If your cart only allows you to add one item at a time, it is possible register_globals is on. This may work to disable it:

php_flag register_globals off

2. If your cart has magic quotes enabled, This may work to disable it:

php_flag magic_quotes_gpc Off

3. Set max upload file size. Most hosts will limit this and not allow it to be overridden but you can try

php_value upload_max_filesize 999M

4. set max post size. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

php_value post_max_size 999M

5. set max time script can take. uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

php_value max_execution_time 200

6. set max time for input to be recieved. Uncomment this line if you have a lot of product options or are getting errors where forms are not saving all fields

php_value max_input_time 200
