#### # INSTRUCTIONS

```
#
# URI rewriting requires the rewrite module (mod_rewrite) as well as
# the following option. If your configuration does not allow this
# option to be enabled here, then please add it to your server
# configuration and comment out the following line. You must also
# have "FileInfo" overrideable. If you do not currently allow this,
# please add the following line to the configuration file in the
# directory section where Steam resides.
```

```
#
# <Directory "/path/to/steam/docroot">
#     AllowOverride FileInfo
#     Options FollowSymLinks
#     Order allow,deny
#     Allow from all
# </Directory>
#
```

```
<IfModule mod_rewrite.c>
```

```
    RewriteEngine On
```

```
    RewriteBase /
```

```
    RewriteRule ^/index.php$ /index.php [L]
```

```
RewriteRule ^(.*) index.php
```

```
# If steam is installed in a sub directory of the document root, use the  
# following lines instead and change {BASE_URI} to the location that points  
# to your document root
```

```
#RewriteBase {BASE_URI}
```

```
#RewriteRule ^(.*) index.php
```

```
</IfModule>
```
