```
# .htaccess for Catagrid.com
# Written by Bill, this is not part of CodeIgniter but works with it.

# !IMPORTANT: These directives should go into your Virtual Host config
# .htaccess files are overhead. Having these configs preloaded will speed
# up your site. Granted, this is like a 1k file, but still. It's important
# to do things the right way.

# This removes 'index.php' from the URL for pretty URLs
RewriteEngine on
RewriteCond $1 !^(index\.php|[Javascript / CSS / Image root Folder name(s)]|robots\.txt)
RewriteRule ^(.*)$ /index.php/$1 [L]
```
