# Øsince
#
# Please read this note before using this file.
# It is possible to get an error at runtime, if the line –
# 'Options +FollowSymLinks' uncommented. Comment the line listed below if
# the error occured. Reason – is the some server mod_rewrite configuration.
# Comment this line if an error occurred. Read the note above.
Options +FollowSymLinks
```

mod_rewrite in use RewriteEngine On # Disable directories browsing, that don't have an index file, #Options -Indexes

```
# There are possible options to configure the 'RewriteBase'.
#
# Option 1. There is a domain name for your website and the website
            is placed in 'www' directory (documentroot).
#
#
#
            RewriteBase /
#
# Option 2. There is a domain name for your website and the website
            is placed in subdirectory called "mysite"
#
#
            RewriteBase /mysite/
#
#
# Option 3. There is no domain name for your website and the website
            is placed in 'www' directory (documentroot).
#
#
            RewriteBase /~your_username/
#
#
# Option 4. There is no domain name for your website and the website
            is placed in subdirectory called "mysite"
#
#
#
            RewriteBase /~your_username/mysite/
#
# configured with option 2
RewriteBase /toKernel.1
```

Rewrite conditions configuration
RewriteCond %(REQUEST_FILENAME) ! -f
RewriteCond %(REQUEST_FILENAME) ! -d
RewriteRule ^(.*)\$ index.php?tokernel_params=\$1 [QSA,L]

```
