```
# In case you want to add a .htpasswd authentification
# you'll have to add the host of the shop as an allowed entity,
# so that calls from the host skip the authentification
# Example:
# Order Deny,Allow
# Deny from All
# AuthType Basic
# AuthName "Access not allowed"
# AuthUserFile path_to_htpasswd_file/.htpasswd
# Require valid-user
# Allow from localhost
# Satisfy Any
